

FAASTeam presents:

CFI Professional Development Seminar

This fall, the Teterboro FAASTeam will host a 3 hour professional development seminar for all Instructors to discuss new and recurring issues in Flight and Ground Training.

Speakers from Textron-Lycoming will be presenting best practices, tips and techniques on engine management and operation with a special emphasis on flight school environments, Doug Stewart (SAFE) will discuss Professional Flight Instruction and share his insights on best practices for conducting a Flight Review, and Don Argintar will discuss airworthiness determination, conditions for safe flight and advanced pre-flight tips to help break the accident chain before it starts.

During the 3 hour event, you will have an opportunity to apply what you learn in this seminar and pre-flight an aircraft especially rigged with the most common airworthy and safety-of-flight defects.

While many of you want to instruct on Saturday morning the 3 hours you devote to professional CFI development will be more valuable to you in the long run. Reschedule your students to later in the day and help yourself to a knowledge rich event.

If you know of any CFIs that are not registered on FAASafety.gov, please invite them to the
